PROJECTS

One-One Video Call App

WebRTC, ExpressJS, NodeJS, socketIO

- Similar to Google meet but for one to one.
- Difficulty faced: Needed to integrate TURN servers to overcome the NAT/faulty router problems that hides our ip address from the STUN server.

Github

Website

Personal Blog App

MongoDB, ExpressJS, NodeJS

- This is a Personal blog app.
- Where the user can post a picture, image and description about the blog.
- The user can Create, Read, Update and Delete the Blogs.

Github

Website

Colour game

Html, CSS, Javascript

- This is a fun color guessing game. In this project, an RGB value set is given. From the given value set the user should guess the color from the presented collection of colors.

Github

Website

Pressure Cooker Automation

Arduino Uno, C++

- This project helps our day to day life by switching off the pressure cooker after a certain number of whistles.
- It also has a safety mechanism where it detects gas leakage and turns off the stove.
- We can also set a timer on the number of minutes to wait before turning off the stove.
